Expert support  
wherever it is needed.

## Key features

WOLFF Assist is a modern hands-free support system for crane operators and service technicians using smart glasses.

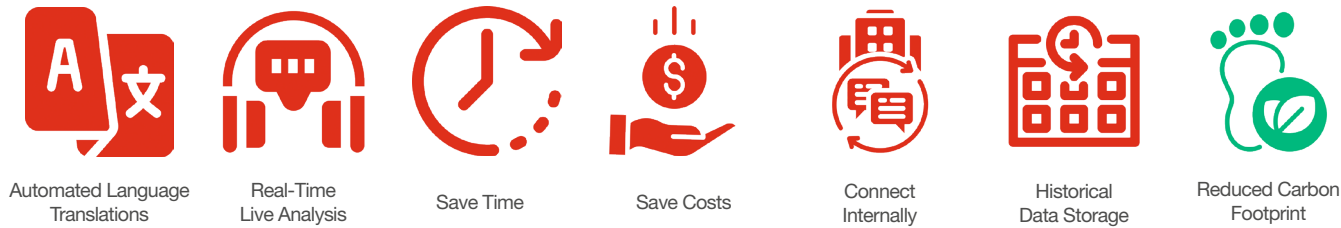

This tool is set to enhance efficiency and reduce costs by minimizing repair time significantly. With multilingual support and voice control, WOLFF Assist is a game-changer in the global construction industry.

Operators or technicians can always work hands-free, which is a considerable advantage in terms of safety and flexibility. The camera transmits the technician's field of vision on the construction site to WOLFF service experts in real time.

The WOLFF Assist Service Glasses

## Benefits

## Hands-free technology

Get **real-time live analysis and support** with WOLFF Assist. You no longer need to depend on a site visit from a professional to investigate the situation. Choose to have a video call with our support team or share pictures to arrange a troubleshooting request, instead. Assistance has been made swifter and easier.

**Save time** with prompt solutions and around-the-clock support at your request. You can now reduce the break-down time or in some cases, eliminate it by resolving the issues yourself with the help of our support team. Select the available technical engineer from our team on the WOLFF Assist display panel and seek assistance as and when needed.

Technician on site

## Digital transformation

With the revolutionary WOLFF Assist, your team can now communicate **in multiple languages**, thanks to the advanced automated translation capability. This feature ensures seamless interaction and collaboration among diverse teams, regardless of language barriers. We value diversity, and we're proud to integrate this into our products and services.

Choose to **store a record for historical references** for your team to troubleshoot and manage issues. If you encounter a malfunction in operations that repeats itself, your team will now be ready to resolve it instantly thanks to references. With the historical storage, you can also choose to train your team members using the WOLFF Assist storage database.

We provide you with the liberty of **connecting internally with your team** to resolve support-related issues. This is beneficial for your team to ensure that your solutions are being tackled by catering to the challenges based on your experience.

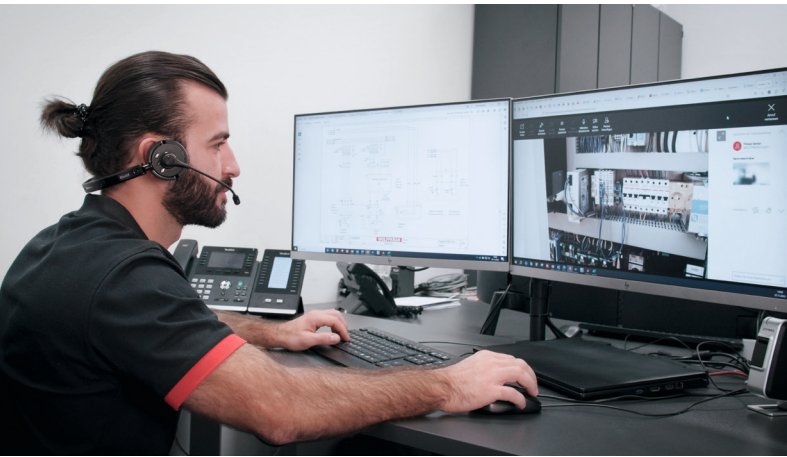

## Sustainability at your hands

Using WOLFF Assist, we're stepping forward to address environmental challenges by **reducing the overall carbon footprint**. We've now made it easier for our users to reach us virtually while we attempt to resolve matters that would once involve physical intervention. We're reducing carbon footprint, one virtual assistance at a time.

**Save costs** on on-site assistance and increase productivity. Using WOLFF Assist, you can expect to reduce repair times and service costs significantly (approximately up to a whopping 70%) by facilitating faster troubleshooting and more efficient maintenance procedures. This translates to tangible cost savings for construction companies and crane operators.

WOLFFKLAN Server

WOLFF Service Expert

100% browser-based application – no software needs to be installed on the mobile device.  
Simple login with personal access data. Data is transmitted in encrypted form and the application is managed on a WOLFFKLAN server.
