

# WOLFFKRAN

## The Leader of the Pack.

As the inventor of the modern tower crane, WOLFFKRAN sets milestones in crane technology. A WOLFF is the logistics center of the construction site, created for economic and intelligent building.

An exciting opportunity has arisen. For our WOLFFKRAN company in New York we are looking for an

## APPLICATIONS ENGINEER

### Your Challenge

WOLFFKRAN is a dynamic and expanding company. In the last two years our team has almost doubled, and we are continuing to expand our leading position in crane technology with the international market. To do so we require qualified reinforcement. To support the growth in the US business, the applications engineer will be supporting professionally the technical sales in the US market. He supports all US projects in engineering aspects. He provides also support to our customers answering their questions and resolving their issues with regard to engineering content.

### Your Main Tasks

- Technical sales support for the US market
- Engineering support for US projects, including schematic CAD drawings and feasibility studies
- Provide crane support loads to customers
- Analysis of tower cranes based on various design codes as required by customer specification or local authorities
- Managing special crane engineering projects in the USA
- Produce tower crane erection/dismantling procedures for incorporation into customer planning
- Prepare miscellaneous drawings, analyses, documentation and reports as required to support the WOLFFKRAN product line
- Create configuration sheets for tower cranes based on contract and engineering requirements

### Your Profile

- Degree in Engineering (Mechanical or Electrical Engineering preferred)
- Strong technical and communication skills, with the ability to work independently while carrying out corporate policies and procedures
- Affinity for technical product expertise with tower cranes (capital equipment)
- Capability to read, analyze, and interpret general business periodicals, technical procedures, and governmental regulations
- Ability to write meaningful reports, business correspondence, and procedure manuals
- Proficiency to effectively present information and acting as a contact person to respond to questions from managers, customers and other intercompany personnel
- Ability to define problems, collect data, establish facts, and draw valid conclusions
- In-depth technical, sales and tower crane applications knowledge a plus
- Ability and willingness to travel (approx. 25%)

A strong drive for success, continuous improvement approach and a consistently positive attitude and outlook are vital qualities of members of the Wolffkran team.

### Your Future Perspective within the WOLFF-Team

We offer an extraordinary challenging career opportunity with

- a competitive salary
- retirement savings plan and
- a comprehensive benefits package that includes medical, dental, life insurance, disability, and vision.

### Your next Step

If you're ready to be challenged, we look forward to hearing from you. Please send your application with your resume, a brief introduction of your experiences and details on your salary expectations and availability to our Vice President Operations, Mr. Christer Bradley, [c.bradley@wolffkran.com](mailto:c.bradley@wolffkran.com).

For first questions feel free to contact Mr. Christer Bradley, P (+1) 718-418-9650.
